October 21, 2021

Dear Residents,

**There is RAIN in our forecast; Keep Dry & Stay Safe!**

While we welcome the occasional rains that remind us wintertime is coming, we need your help to prevent costly building repair needs. Please be sure to keep drains, grates and screens clear of dry leaves and debris. Pondered rainwater can result in water damage – **Units with Atriums are particularly vulnerable.**

Management has arranged and scheduled gutter and downspout cleaning this month, the contractor is currently working at Phase 2 and is eventually working their way to Phase 13.

We appreciate the collective effort and responsibility of all Residents and thank you for keeping this Community a wonderful place to live!

Thank you,

*Management*
